

Economics of Open Courseware

Edward Mokurai Cherlin, Sugar Labs

- Cost of textbooks: Hundreds of £/year
- Cost of computer: Hundreds of £/3 years
- Cost of Open Courseware: £0
- Cost of Free Software for education: £0

Plus minor expenses for Internet and electricity

Less costs of storing and distributing books

No change in costs of teacher training

Plus children learn computer and cognitive skills, according to Peru study

The remaining questions, then, have to do with

- Funding to develop Open Courseware
- Research into digital learning
- Digital curriculum development
- Teacher training for digital learning
- Testing for digital and cognitive skills

Existing funding can be redirected to these.
